

Data Science & Analyst Portfolio

By : Deni Ansyah

SELF-OVERVIEW

Hi, I'm Deni!

A second-semester undergraduate student majoring in Data Science with a growing passion for data science—especially in the area of **data analysis**. My academic journey has sparked my curiosity in how data can be transformed into meaningful insights that support better decision-making in various industries.

While I am still early in my university career, I have proactively explored the world of data by studying tools such as **Excel, Python and SQL**. Learning how to apply them in real-world scenarios like data cleaning, visualization, and simple predictive modeling. I am particularly interested in understanding user behavior, business performance, and how data storytelling can influence strategic actions.

I am currently seeking opportunities to deepen my experience through internships, collaborative projects, or mentorship, especially in roles related to **data analytics, business intelligence**, or data-driven research. I believe that with continuous learning, curiosity, and dedication, I can grow into a valuable contributor in the field of data science.

EDUCATION

● **Cakrawala University**
Data Science
Jan 2026 – Present

- Relevant Coursework: Data Analytics, Business Statistics, Database Management Systems (SQL), Python Programming, Data Structures & Algorithms, Data Modeling & Data Warehousing, Data Visualization, Machine Learning Fundamentals, Cloud Computing, and Predictive Analytics.

● **Dibimbing.id**
Data Science Bootcamp
Mar 2025 – Okt 2025

- Learn about Statistics, Data Analytics, Machine Learning, Data Visualization, and do project related to the application of Data Science.
- Technical Skills: Python, SQL, Tableau, Power BI.
- Techniques: Hypothesis testing, Exploratory Data Analysis, Data Visualization, Linear Regression, Ridge Regression, Lasso Regression, K-Nearest Neighbors, Decision Tree, Random Forest, Gradient Boosted Trees, Logistic Regression, Factor Analysis, K-Means Clustering.

SKILLS

Programming Languages

Frameworks

Visualizations

Soft Skills

- **Communication**
- **Teamwork**
- **Data Storytelling**
- **Analytical Thinking**
- **Problem Solving**
- **Desire to Continue Learning**

PORTFOLIO-1

Delivery Delay Prediction with Machine Learning

Description:

The objective is to predict whether a shipment will be delayed or not using machine learning techniques, and to understand what factors contribute most to these delays.

Method:

Business & Data Understanding, Data Preprocessing, Exploratory Data Analysis (EDA), Modeling, Evaluation using F1 Score and Feature importance analysis with SHAP.

Result:

Decision Tree was selected for its stable performance on both training and testing sets (F1 Score $\approx 71\%$).

[DECK](#)

PORTFOLIO-2

Marketing Strategy Research with A/B Testing

Description:

A fast-food chain plans to add a new item to its menu. However, they are still undecided between three possible marketing campaigns for promoting the new product. In order to determine which promotion has the greatest effect on sales, the new item is introduced at locations in several randomly selected markets.

Method:

Business & Data Understanding, Data Preprocessing, Exploratory Data Analysis (EDA), Assumption Test (Normality and Homogeneity Test) and Post-hoc Test.

Result:

Large Markets lead in sales, Promotions Type 1 & 3 perform best, Type 2 underperforms, new stores need deeper analysis, and older stores remain important.

[DECK](#)

PORTFOLIO-3

Customer Segmentation using RFM Analysis

Description:

With the growing customer base, the company faces challenges in retention and loyalty. To address this, it applies RFM Analysis to segment customers and design more effective marketing strategies

Method:

Business & Data Understanding, Data Cleaning, Data Manipulation, Exploratory Data Analysis and Customer Segmentation.

Result:

Champions Segment still dominates in the overall assessment.
