

DENI ANSYAH

Data Analyst | Business Intelligence

Bogor, Indonesia | deniansyah000@gmail.com | [+6281287493529](tel:+6281287493529) | [LinkedIn](#) | [Github](#) | [Portfolio](#)

SUMMARY

Data Analyst with hands-on experience in **operational reporting, dashboard development**, and data analysis using **Microsoft Excel, SQL, Python, and Power BI**. Experienced in processing large datasets, performing **data validation**, and delivering **daily, weekly, and monthly reports**. Strong attention to detail and analytical problem-solving skills gained through logistics, manufacturing, and business analytics projects. Able to transform operational and sales data into actionable insights to support business decision-making.

EDUCATION

CAKRAWALA UNIVERSITY

Data Science

Remote

Jan 2026 – Present

- **Relevant Coursework:** Data Analytics, Data Modeling, Machine Learning, Deep Learning, Natural Language Processing (NLP), Statistics, Database Systems.

UNIVERSITAS TERBUKA

Information Systems (Transferred to Cakrawala University)

Bogor, Indonesia

Jan 2025 – Jan 2026

- **Relevant Coursework:** Database Management, Business Intelligence, Information Systems Analysis, Data Analytics.

DIBIMBING.ID

Data Science Bootcamp (Certificate) (Report Card)

Remote

Mar 2025– Oct 2025

- Learned fundamental concepts of data science, analytics, and business understanding.
- Technical Skills: Microsoft Excel, Python, SQL, BI tools (Power BI, Tableau), Data Mining, A/B Testing.
- Business Knowledge: Cohort Analysis, Funnel Analysis, Business/Product Strategy Basics, Customer Segmentation.

WORKING EXPERIENCE

PT. Unipack Indosystem (Wings Group)

Bekasi, Indonesia

Logistics Administration

Dec 2025 – Present

- Prepared **daily, weekly, and monthly operational reports** using Excel to support warehouse operations.
- Processed and validated **30–60 logistics transactions daily** including Delivery Orders (DO), Goods Receipt Notes (GRN), and Picking Lists with **99%+ accuracy**.
- Conducted **inventory reconciliation** and **data validation** to ensure consistency between physical stock and system records.
- Maintained warehouse documentation and supported **KPI monitoring** to improve operational visibility and inventory accuracy.

DATA ANALYST PROJECTS

A/B Testing for Landing Page Designs – Python, Power BI – Jun 2026

- Performed hypothesis testing on three landing page designs (Vibrant, Heat, and Cold), revealing that **Cold design achieved the highest conversion rate (18.08%)** compared to Vibrant (12.13%) and Heat (15.17%).
- Performed hypothesis testing on different marketing channels, revealing that **Social Media has a significantly lower conversion rate (14.45%) compared to Paid channel (15.68%)**.
- Delivered data-driven insights via PowerPoint presentation tailored for business audiences.

A/B Testing for Marketing Campaign Strategy – Python, Power BI – Jun 2026

- Conducted end-to-end A/B testing analysis on three promotional strategies across 137 store locations to identify the most effective campaign for a new product launch.
- Performed **exploratory data analysis (EDA), assumption testing (Shapiro-Wilk, Levene Test), Kruskal-Wallis, ANOVA, Dunn Test, and Tukey HSD** to evaluate sales performance differences among promotion groups.
- Identified **Promotion Type 1** as the highest-performing strategy, generating **average sales of 232.40K**, outperforming Promotion Type 3 (**221.46K**) and Promotion Type 2 (**189.32K**).

Customer Segmentation Analysis using RFM – Python, Power BI, DAX – Sep 2025

- Analyzed **1M+ e-commerce transactions** from a global UK-based online retail company to identify customer behavior patterns and revenue opportunities.
- Developed an interactive Power BI dashboard to monitor **customer segments, purchasing behavior, and revenue contribution.**
- **Performed end-to-end data preprocessing** including missing value handling, duplicate removal, cancellation filtering, negative value validation, and feature engineering.
- Reduced dataset from **1,067,371 to 805,620 clean records** to ensure data quality and analysis reliability.

SKILLS

Hard Skills: Microsoft Excel (**Pivot Table, XLOOKUP, VLOOKUP, INDEX-MATCH, Power Query, Dashboard Reporting**), Google Sheets, SQL, Python (Pandas, NumPy, Scikit-Learn, Plotly), Power BI, Tableau, Streamlit, Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), KPI Monitoring, Dashboard Development, Reporting Automation, Business Analysis, Data Visualization, GitHub.

Soft Skills: Stakeholder Communication, Business Storytelling, Cross-functional Collaboration, Analytical Thinking, Problem-Solving.

Language: Indonesian (Native), English (Professional Working)
